Current Campaign Note

For the live cave scene, confirm slot-refresh with Marcus. Max sheet shows full level 3 capacity; table may track current expended slots separately.

Alphie J. Roane - Play Notes

Section	Notes
Role at table	Primary tactical thinker, negotiator, ritualist, and moral/legal coordinator. Best when turning chaos into a public oath or operational plan.
Personality	Polite, scholarly, serious, and service-minded. Wants noble rank to mean responsibility, not privilege. Keeps his word even when it costs him leverage.
Cave priorities	Use Web/Grease to reshape the battlefield. Keep Shield/Misty Step as survival tools. Do not waste slots on low-value damage if allied archers can solve the problem.
Best level 3 tactics	Web can split goblins from ogres or pin a choke point. Misty Step gets Alphie out of melee. Portent can force a key enemy save failure or prevent a fatal hit.

Rules Integrity Notes

This is a custom table-use sheet for 2014 D&D 5e. It lists maximum level 3 capacity. Current spell slots, HP, and active effects during the live chat campaign should be checked against Marcus's latest state before play resumes.
